@QUartsci killing it! Take courses you are passionate about, not just "bird courses" #lcantevenhandlethis

Looking for a bird course?

Here's two.

BIOL 308/1.5 Field Studies in Biology I
One week of field work plus written assignments in one or two areas of study to be done when specialized modules are available in May, July, August or February. Studies may include ecology of **birds**, fish, insects, small mammals, plants, tundra and taiga, lakes and caves.

BIOL 317/3.0 Field Biology II
Two weeks of field work plus written assignments in one or two areas of study to be done when specialized modules are available in May, July, August or February. Studies may include ecology of **birds**, fish, insects, small mammals, plants, tundra and taiga, lakes and caves.

Ok - so these ones are only to Biology students and require Departmental consent, but we got your attention so now check out some other cool courses >
